

St. Elizabeth Playground

Jersey City, NJ

Klae Construction completed this addition for the Franciscan Sisters of St. Elizabeth in Jersey City. The 4,700 ft² addition includes a playground with a parking garage below it. The new parking garage is fully heated with a directional lighting system to control traffic flow. An elevator was constructed to link the playground to the existing structure. The playground was built from the ground up and contains stairwells, a handicap ramp, a unisex restroom, rubberized playground

surface covering the entire courtyard to ensure safety for the children playing in the area. The outdoor area also contains a partial-peristyle, serving as a canopy with seating underneath for audiences when there are outdoor performances in the courtyard. The entire exterior is comprised of soft tile and brick, creating a modern architectural aesthetic.
