

Project Profile: Automotive

Prestige Volvo

East Hanover, NJ

Architect: Weiss Design Group & MSC Architects

Scope of Work: Renovation and Addition

Klae Construction recently completed a new addition and renovations for Prestige Volvo in East Hanover, NJ. The first phase of the project was the demolition of the existing showroom, client lounge and the façade. The expanded showroom, which included the client lounge area, and handicap accessible bathrooms, were then constructed.

The "Volvo Next Face" facility design was used, giving the structure a contemporary aesthetic and the Volvo brand consistency. Owners elected to condense their operation into the remaining half of the building until this phase was complete. The second phase was then able to include the new, expanded service adviser areas. Many areas of multiple addition construction remnants were addressed to provide a free flowing floor plan to the updated facility
