

Project Profile: Retail

ETD Westwood

Westwood, NJ

Architect: Stephen Carrozza

Scope of Work: Ground-up Construction

ETD Westwood is a ground-up, 8,445 ft² service center. The construction featured use of a pre-engineered steel building with a standing seam roof. The façade also used decorative split face block walls. The interior contains six service bays with sectional glass doors, recessed alignment racks, customer service, waiting area, restrooms. The construction also included second floor tire and parts storage. Site improvements included drainage, curbs, sidewalks, paving, lighting, and landscaping.
