

Project Profile: Commercial-Industrial

ReCommunity

Mine Hill, NJ

Architect: MSC Architects

Scope of Work: Reconstruction

After the roof collapsed and severely damaged the previous structure, Klæ Construction reconstructed the 20,500 ft² building. The reconstruction included new footings and concrete slabs; tilt-up concrete walls; structural steel columns with bar joist and steel roof deck; new equipment mezzanine; loading docks; complete building sprinkler system; new electric service and lighting; and new administrative offices, break room, conference room, and restrooms.
