

Project Profile: Automotive

DCH Paramus Honda Car Prep

Paramus, NJ

Scope of Work: Renovation

Klae Construction completed a renovation of an existing 13,000 ft² industrial building. The Building includes a 2,000 ft² office space. The construction began with a complete interior demolition. Then, there was reconstruction of the existing building end-walls to accommodate new windows and overhead doors. The renovation included a new roof, electrical service, power, lighting systems, and site lighting. It also included new heating, cooling, and ventilation systems. Finishes included interior and exterior painting, floor, walls, and ceiling finish in office areas, and epoxy floor in the garage area.
