

Project Profile: Commercial-Industrial

Praxair Call Center

Bethlehem, PA

Architect: MSC Architects

Scope of Work: Addition

Klae Construction completed a 5,000 ft² addition to the call center.

The construction featured a one-story addition with decorative EIFS finish on the exterior walls. Building improvements included new HVAC systems, new backup generator, fire sprinkler systems. The addition also included new private offices, modular work stations, new conference room, new employee restrooms. Minor renovations were done to the existing call center as well. Site improvements included drainage, retaining walls, and pavement.
