

Project Profile: Educational

Blair Academy's Chiang Center for Innovation and Collaboration
Blairstown, NJ

Architect: HQW Architects

Scope of Work: ground-up construction

Klae Construction completed this 29,704 ft² ground up construction for Blair Academy in Blairstown, New Jersey. The four story building is a contemporary design for the private high school. It includes a beautiful large skylight with a glass chandelier feature. The Atrium includes a second floor balcony with a glass railing. There are large Bluestone patios with stainless steel railings and a wood pergola. The rooms in the center include a lecture hall, conference rooms, team rooms, media labs, recording studies, a complete passenger elevator, and a complete audio visual system throughout.
