

Project Profile: Automotive

Town Toyota Service Center

Ledgewood, NJ

Architect: MSC Architects

Scope of Work: Renovation

This project was a renovation of an existing one-story building for Toyota's new Service Center. Klæ Construction raised the existing roof structure to accommodate the height requirements for new auto lifts.

The project also included a decorative EIFS finish on exterior walls, new HVAC rooftop systems and auto exhaust venting systems, new parts department including storage area and parts counter, new employee breakroom and restrooms. Site improvements included drainage, curbing, paving, and landscaping. There was a complete improvement of Kings Parkway, the road that will link the new Service Center to the Towne Toyota Showroom located on the corner of US-46 and Arlington Avenue.
